Education

Unitend International University

Bachelor of Science in Computer Science

Sep. 2019 – May 2023

Dhaka, Bangladesh

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Machine Learning
- Deep Learning
- Artificial Intelligence
- Systems Programming
- Computer Architecture

Experience

Awfatech Global SDN BHD

Software Engineer

Sep 2023 – Present

Subang Jaya, Selangor, Malaysia

- Built a financial dashboard to track and manage funding and expenses for mosques in Selangor.
- Developed a SaaS platform to help manage all mosque operations in Selangor.
- Created a website to store and share static data through APIs for use in different projects.

SJ Innovation LLC

Software Engineer Intern

May 2023 – August 2023

Dhaka, Bangladesh

- Implemented features according to requirements, updated the app structure, and optimized API requests to enhance performance.
- Developed migration scripts for seamless database transitions, successfully migrating data from PostgreSQL and MySQL
- Contributed to the development of an AI assistant that recommends suitable doctors based on specific issues and their availability, streamlining appointment bookings.

Projects

E-Commerce Platform | *Next.js, TypeScript, FastAPI, PostgreSQL, Stripe*

2023 – Present

- Engineered a comprehensive full-stack e-commerce solution featuring real-time inventory management, robust payment integration, and advanced product filtering capabilities.
- Architected a scalable backend with FastAPI and PostgreSQL to handle complex business logic and secure user transactions.
- Developed an intuitive admin dashboard with Next.js to monitor sales, manage products, and push real-time updates seamlessly.

Content Management System (CMS) | *Next.js, PostgreSQL, FastAPI, Redis, TypeScript*

2023

- Designed and implemented a highly scalable CMS catering to modern web deployment needs, incorporating SEO optimization techniques and multi-language support from the ground up.
- Integrated Redis caching to significantly improve data retrieval times and reduce database load on the PostgreSQL backend.
- Built a powerful, secure administration panel allowing users to efficiently manage complex digital content workflows.

Sentiment Analysis & Machine Learning Models | *Python, Scikit-learn, XGBoost, NLP, Gradio*

2022 – 2023

- Developed and optimized a Sentiment Analysis Model using NLP and Scikit-learn to extract customer sentiment trends from unstructured text data.
- Built an advanced House Price Prediction regression model utilizing feature engineering and ensemble methods (XGBoost) for enhanced accuracy.
- Deployed interactive demonstrations of these models via Gradio on HuggingFace and Kaggle to allow real-time predictions and stakeholder evaluation.

Task Management Application | *React, Node.js, MongoDB, Socket.io*

2022

- Built a collaborative task management tool enabling teams to coordinate seamlessly through shared workspaces.
- Incorporated Socket.io to establish real-time, bidirectional data synchronization across multiple active clients instantly.
- Implemented secure user authentication and designed a fully responsive UI using React to ensure a consistent experience across devices.

Personal Portfolio Website | *Next.js, TypeScript, Tailwind CSS, React 19*

2024

- Architected a highly interactive, single-page personal portfolio to showcase professional career progression, technical skills, and software projects.
- Engineered a modern UI featuring glassmorphism, dynamic animations, and complex grid layouts utilizing advanced Tailwind CSS.
- Integrated a serverless contact infrastructure using EmailJS to handle direct communications with active validation and status feedback.

Technical Skills

Languages: TypeScript, JavaScript, Python, HTML/CSS, SQL

Frontend & Backend Frameworks: Next.js, React, Tailwind CSS, Node.js, FastAPI, PostgreSQL

Machine Learning & Data: Scikit-learn, TensorFlow, Pandas, NumPy, XGBoost, Gradio, NLP

Developer Tools: Git/GitHub, Docker, Linux, VS Code, Kaggle
